

Week 1 – Career Development

Journal entries

All-student prompts

All students should reflect on and respond to the following prompt(s):

Prompt 1: Describe your orientation of the workplace and include the following: when did it occur, who did you meet with, and what are three key things you learned during the orientation?

During our first day orientation, I was able to meet Nikki and Felicia from the emerging talent team, Mary from the UX team, many college interns, and associates who led workshops. Some things I learned was that Red Hat is a very welcoming community open to helping anyone, they are currently focused on developing the futures of predictive AI and generative AI in all spaces, and lastly I learned the purpose of the highschool interns is to hopefully bring the next generation into more technical roles.

Prompt 2: Define the purpose of the business/organization – what they do, structure, who are their customers, etc. What is your job description – what will you be doing, who will you work with, where do you fit in, etc.?

The purpose of Red Hat is to develop open source software meaning that anyone can contribute to developments. There are many different roles at red hat, some technical and not. Their customers are companies looking to be consulted on issues with software, look into using red hats software developments in their company, and training people in their developments.. I am an intern at Red Hat, mostly learning the ropes of the vastly differing teams here and exploring all that red hat offers.

Additional Wake County prompts

Students completing the internship program for Wake County schools must also complete the following prompts IN ADDITION to the 'All-student prompts'

Prompt 1: Describe your orientation of the workplace and include the following: when did it occur, who did you meet with, and what are three key things you learned during the orientation?

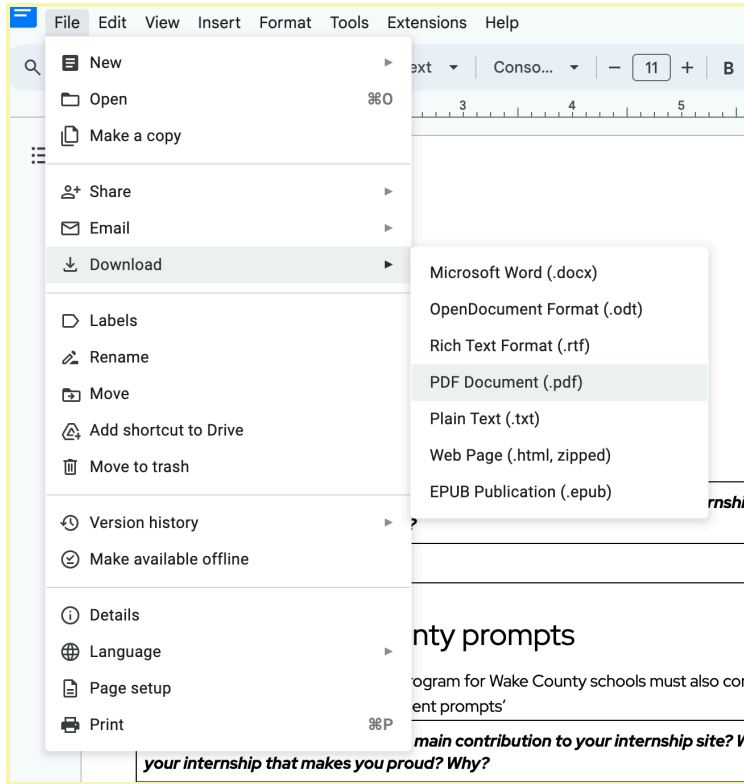

Add your response here

Export + contribute your reflection

Stop here! You will complete the steps below during your Week 2 GitHub lab

1. Once you've filled out the above prompts, export this doc as a PDF. Note: make sure you rename the file to be in the format **[Firstname Lastname] Week 1 Journal Entries**

2. Now that you have a PDF of this week's reflections saved locally to your laptop, you should contribute the PDF to your personal GitHub dropbox area in [our shared repo](#).
