

# Week 1 – Career Development

## Journal entries

### All-student prompts

All students should reflect on and respond to the following prompt(s):

**Prompt 1:** Describe your orientation of the workplace and include the following: when did it occur, who did you meet with, and what are three key things you learned during the orientation?

My orientation occurred on Monday July 8th. I met Nikki Salazar, Felicia Watson, and a few other people at Red Hat who guided me through the day, they were all amazing people. I learned that Red Hat is a technology based company, I also learned that Red Hat was also doing this program in Raleigh, North Carolina, and I got to meet the interns there. I also learned that I have a mentor who is a college intern who I will meet up with once every week.

**Prompt 2:** Define the purpose of the business/organization – what they do, structure, who are their customers, etc. What is your job description – what will you be doing, who will you work with, where do you fit in, etc.?

Red Hat is a software company that provides open source software products to big organizations. I am an intern at Red Hat and will be working with fellow interns and red hatters to develop practical skills, industry insights, and valuable networking connections. I will be participating in workshops, labs, sessions, job shadows, etc to help develop the mentioned things. I'm excited to learn about the technology aspect as I want to go into technology in the future and I believe my career goal is to become a software engineer.

### Additional Wake County prompts

Students completing the internship program for Wake County schools must also complete the following prompts IN ADDITION to the 'All-student prompts'

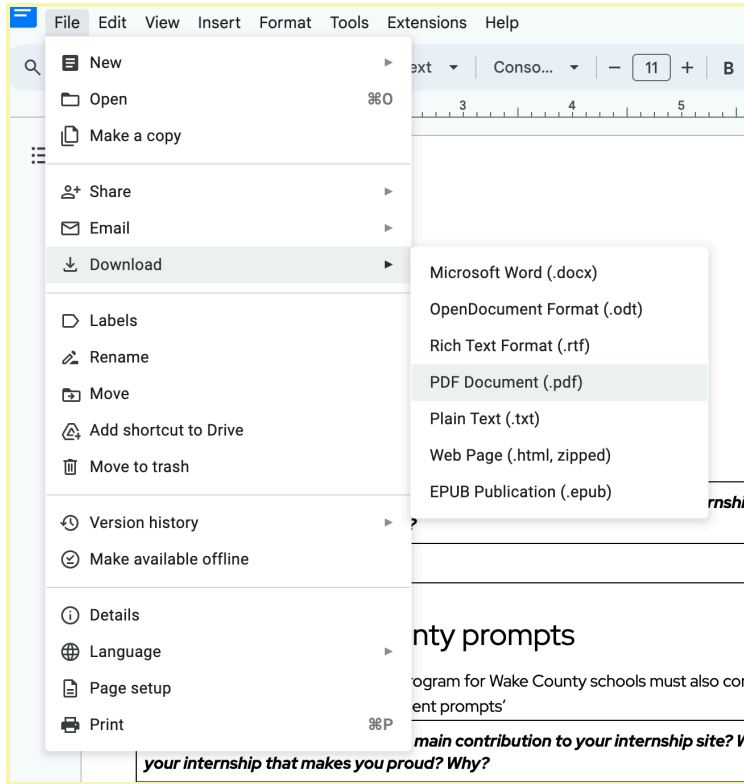

**Prompt 1:** Describe your orientation of the workplace and include the following: when did it occur, who did you meet with, and what are three key things you learned during the orientation?

### Export + contribute your reflection

**Stop here!** You will complete the steps below during your Week 2 GitHub lab

1. Once you've filled out the above prompts, export this doc as a PDF. Note: make sure you rename the file to be in the format **[Firstname Lastname] Week 1 Journal Entries**

2. Now that you have a PDF of this week's reflections saved locally to your laptop, you should contribute the PDF to your personal GitHub dropbox area in [our shared repo](#).
