

Week 1 – Career Development

Journal entries

All-student prompts

All students should reflect on and respond to the following prompt(s):

Prompt 1: *Describe your orientation of the workplace and include the following: when did it occur, who did you meet with, and what are three key things you learned during the orientation?*

The orientation of the workplace occurred on the first day in the main conference room on the second floor. There we met Nikki, Faiza, were introduced to the program, and there was a quick ice-breaker activity there after. This was followed by a tour of the building in Boston, then the rest of the day followed. The three key takeaways were that:

1. Red Hat is the leading company in open source technology
2. The workplace is composed of 3 main floors
3. That each week of the program will have a specific topic and focus

Prompt 2: *Define the purpose of the business/organization – what they do, structure, who are their customers, etc. What is your job description – what will you be doing, who will you work with, where do you fit in, etc.?*

The purpose of red hat is to develop open source software and technology to further innovate technology. The company makes money by selling subscriptions to services concerning their open source products to companies interested in the perks that come with the subscriptions. In my job description, which is a high school intern, we will mainly be learning about the Red Hat purpose, structure, and culture, while also doing activities such as job shadowing. We will work with many departments of the company, from the college interns to even meeting the higher ups.

Additional Wake County prompts

Students completing the internship program for Wake County schools must also complete the following prompts IN ADDITION to the 'All-student prompts'

Prompt 1: *Describe your orientation of the workplace and include the following: when did it occur, who did you meet with, and what are three key things you learned during the orientation?*

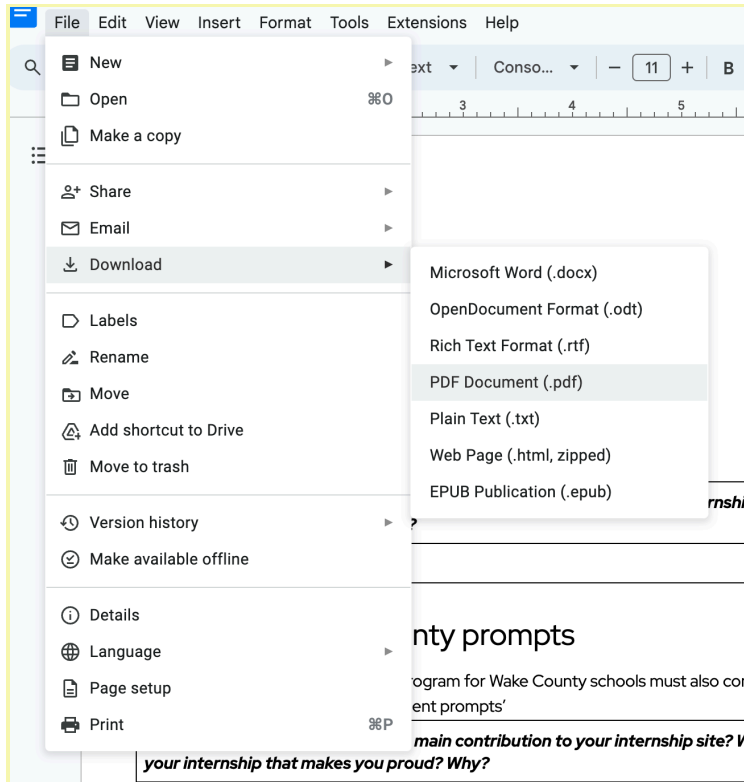

Add your response here

Export + contribute your reflection

Stop here! You will complete the steps below during your Week 2 GitHub lab

1. Once you've filled out the above prompts, export this doc as a PDF. Note: make sure you rename the file to be in the format **[Firstname Lastname] Week 1 Journal Entries**

2. Now that you have a PDF of this week's reflections saved locally to your laptop, you should contribute the PDF to your personal GitHub dropbox area in [our shared repo](#).
